

I live in Indiana. When the State of Indiana, started their telephone privacy act. I logged on and did it right away through the Internet. I was receiving between 9 to 15 calls a day, one the main phone line and maybe 7 to 10 on our second line. And would even get calls on Sunday. Even though I would tell the solicitors no thank you and PLEASE REMOVE ME FROM YOUR LIST! But that didn't matter. Now I maybe receive 1 maybe 2 calls a week, and those, when I talk to the person are usually cold call numbers and they state to me that they will remove me right away. and are pleasant about it! I am sure it has to do with the Act. (LAW) that we have here in Indiana.

Why in the world would you want to implement a law that would be less comprehensive then we already have he in Indiana!!! Please reconsider what you are doing!
